Rep. Adam Schiff, the top Democrat on the House Intelligence Committee, said Friday that his committee is asking to interview Michael Cohen, President Trump's former personal attorney, in the wake of the judge's ruling that the president cannot block a subpoena for his long-time lawyer's financial records. "We are asking for an interview with Mr. Cohen," Schiff told reporters. Cohen last week testified before the House Oversight Committee about his alleged hush-money payment scheme with Trump's former National Enquirer publisher Karen McDougal. Trump has denied the payments were meant to buy McDougal's silence, and said Cohen should focus on investigating Democrats. Schiff, citing Democratic Chairman Elijah Cummings, said the panel also asked to speak with John Dowd, the former White House lawyer who advised Trump in the Cohen case. "I believe it's important that I give Mr. Dowd the opportunity to explain what if anything he is doing to address his obligations to the Southern District of New York," Schiff said. "Given the court's ruling that Mr. Cohen should comply with the subpoena, it's important that we have that conversation with him," he said. Trump's lawyers have long argued that because Trump was acting in his capacity as a candidate rather than president, any potential payoffs for women during the campaign would not be covered by executive privilege. The argument has held sway in most cases, but Judge Victor Marrero of the Southern District of New York rejected that last week in a ruling that could pose problems for Trump's administration. At issue is the Trump Organization's financial records regarding Trump's longtime former personal attorney. According to court papers, the records may establish that Trump benefited from paying $280,000 to porn star Stormy Daniels, who alleges an affair with the president before he became president, and $130,000 to Playboy model Karen McDougal, who says she had an affair with Trump.This invention relates to a device for transferring tissue samples. What's New In Adobe Photoshop CC 2015 Version 18?

It's been said that walls don't help. Fine, it's sometimes true. But some walls are better than others. A very, very good wall is one that acts as a physical and mental barrier, making one hesitate before crossing its space. A wall can be decorative or a physical obstacle, both make a difference, as the next examples will illustrate. In the following list, we've included many photos of some great walls but also some of the more interesting ones. To make things more interesting, we've also added a short description with each image. It may or may not have helped, but it may at least be interesting to read more about the subject. Enjoy the pictures and get inspired! Here are some gorgeous examples of walls that make us hesitate before crossing them: 1. The Hand Probably the most well-known wall in the whole world, we can't even begin to describe the emotions it generates, as the next example will show us. 2. The Entrance This looks like a very weird place, but it's what it is. You may not be able to enter it, but you can sure admire it… 3. The Safe It is a safe, but the surprise may be a little too much, isn't it? But even though it's a safe, we're sure that you'll never regret having entered it. 4. The Negative Space This is a bit, well, negative, but it's undeniably one of the great walls in the world. Quite often, we see walls of this type when the building owner knows that the designers will be coming around at some point. 5. The Reflective Wall We should probably warn you that this is a dangerous wall and that you should think twice before crossing it. We don't think you'll be sorry, but you may want to avoid this wall too. 6. The Inverted This kind of wall has a very interesting side effect. We don't know if this is a good or bad thing, but it certainly gets the attention of anyone who enters. 7. The Invisible Wall This isn't really a wall, more a piece of furniture; but we think it's a really great wall. Those who don't seem to
