The problem is that it says it's not a game, it's a demo, so I can't use those codes. So I think what I should do is uninstall the game and reinstall? But I can't uninstall the game because I don't have a license key! And it's not. I just want to know what should I do to fix this problem. So what should I do? How can I uninstall the game? I can't even buy a copy of the game because I can't use the code!
