baixar catalogo da euroricambi 2. A: this is your problem Add these lines: also you should add: Q: Why is calling strdup() slower than memcpy() In order to assure that the pointers will all be equal I was using strdup() in code that I shared with Dave Grover. However it turns out that strdup() was slow while memcpy() is fast. I am not sure why this is. Any thoughts on this? typedef struct { int id; int size; } pds; pds *array = NULL; int size = 0; void initArray(pds *array) { char *line = NULL; char *lineBegin = NULL; int
