Q: Applying Linq to Entities with a Where Clause I have the following SQL query: SELECT DISTINCT Patients.PatientId FROM Patients WHERE (Patients.PatientId NOT IN (SELECT PatientsPatientId FROM PatientDeliveries WHERE PatientId = @p)) ORDER BY Patients.PatientId

I cannot seem to make this work using Entity Framework 4.1. I tried the following: var patientInDeliveries = context.Patients.Where(p => p.PatientId != (patientDelivery.PatientId)) .Include(d => d.PatientDelivery) .Where(p => p.PatientId == patientDelivery.PatientId);
