Usthad hotel is a 2012 indian malayalam-language drama film directed by .The present invention relates to a method of fabricating a semiconductor device, and more particularly, to a method of fabricating a semiconductor device that minimizes the consumption of the light source of a photolithography process and simplifies the process. In a conventional method of fabricating a semiconductor device, a mask pattern for forming a semiconductor device is first formed on a wafer on which a semiconductor device is to be formed. The mask pattern is then used for exposing the wafer. The exposed wafer is then developed to form a photoresist pattern to expose a portion of a thin film on the wafer to be used as a sacrificial layer. Thereafter, the exposed portion of the thin film is etched to expose the portion of the wafer that is exposed to the masked pattern, to form the surface of the thin film. When an oxide layer is used as the sacrificial layer, an oxidation treatment is conducted in the fabrication of a semiconductor device. However, when the oxidation treatment is performed on the semiconductor device, the capacitance of the capacitor increases, and a cavity is generated in the sacrificial layer that is formed at the locations of the contact holes that pass through the oxide layer. For these reasons, the oxidation treatment is not very suitable for the fabrication of semiconductor devices. Moreover, when the oxide layer is used as the sacrificial layer, it is necessary to form the contact holes through the oxide layer. To this end, a photolithography process is typically performed on the wafer. However, such a photolithography process not only consumes time and cost, but also requires high-cost exposure equipment and additional processes. =M+nN=fbfVuYvNb+cMqVuYwNbWbqVuYwNamVuYwNamVuY/vdgVlgVlgVlgVng/a27Y/27a4/e/d/cXzi/////w== This is a RSA-1024 key 79a2804d6b
